PROJECTS

CMR Attendance Module —

This project is typed in python using Django Framework. It provides all the functionality related to student attendance. Student Attendance is primarily taken by the teachers . HOD/Admins can view the attendance but can't take it directly. All the student and staff/teachers details are managed by HOD/Admin, but Student/Teacher can update their profile themselves as well.

Quiz/Exam Management System -

Exam management system is a simple and complete Exam/Quiz GUI application in Java designed using JFrame. In this application there are two types of users (Admin and Student). The Admin can add or delete the questions in the database along with viewing the student result. The Students are only allowed to answer the questions within the provided time. MYSQL is used as database
